

# Low Impact Development Stormwater Management Practices: Design and Installation Demonstrations

*A One Day Seminar for Developers, Engineers, Architects, Contractors and Planners Interested in Low Impact Development*

**offered October 28<sup>th</sup>, 29<sup>th</sup>, and 30<sup>th</sup> \*  
10:00 am -3:00 pm  
North Charleston, SC**

Property of the City of North Charleston

This event is designed to provide developers, engineers, architects, contractors and planners with an opportunity to learn about low impact development (LID) strategies for managing stormwater – specifically bioretention swales and pervious surfaces. The design and engineering aspects will be addressed in a short classroom seminar, followed by a site visit to the Oak Terrace Preserve community where these practices are being implemented. This event will feature Elias Deeb, from The Noisette Company, and Mike Horton, from Davis & Floyd. As the project coordinators for the Oak Terrace Preserve site, they will address lessons learned during the OTP development process as well as technical aspects of LID implementation. This event is free of charge and lunch will be provided before the site visit. Transportation between the seminars and the site visit will be provided.

You can register online at [www.dnr.sc.gov/marine/NERR/eventscpt.html](http://www.dnr.sc.gov/marine/NERR/eventscpt.html)! Certificates of completion will be available at the end of the day for CEU and PDH credits. Please contact Nicole Saladin ([nicole@belle.baruch.sc.edu](mailto:nicole@belle.baruch.sc.edu) or 843-546-6219 x241) or Rebekah Szivak ([SzivakR@dnr.sc.gov](mailto:SzivakR@dnr.sc.gov) or 843-953-9024) for questions.

*\* Each seminar is one day only. All seminars are identical and registrants will have the option of choosing a preferred date to attend. Seminars will begin at the Noisette Company conference room (1360 Truxtun Ave. Suite 200, North Charleston).*
