Think

Answer the multiple-choice questions below.

Why do biologists take one egg from each sea turtle nest? *

- to raise a hatching in captivity
- for genetic sampling to determine the mother of the nest
- to relocate the egg
- to use it as a decoy to protect the rest of the nest

What caused the decline of spotted sea trout populations in 2011? *

- overfishing
- shark predation
- cold water temperatures
- lack of food

Which of the following is NOT a difference between the scalloped hammerhead and the Carolina hammerhead? *

- shape of the head
- number of vertebrae
- size
- genetic makeup

Dig Deeper: Choose a year from the article. Use the links in the article to learn more about the topic from that year. What is something new that you learned? *

Discuss: Do you remember hearing about the topic in the year that you choose? What was a highlight in your life that year? *
